### **DETAILED ACTION**

1. This action is in response to the amendment and remarks received on September 22, 2006.

#### ***Priority***

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on March 31, 2004. It is noted, however, that applicant has not filed a certified copy of the international application as required by 35 U.S.C. 119(b).

#### ***Specification***

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.

Art Unit: 3721

- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the aforementioned fastener drive means" in lines 9-10.

There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 112***

6. A claim limitation will be presumed to invoke 35 U.S.C. 112, sixth paragraph, if it meets the following 3-prong analysis:

(A) the claim limitations must use the phrase "means for" or "step for;"

(B) the "means for" or "step for" must be modified by functional language; and

(C) the phrase "means for" or "step for" must not be modified by sufficient structure, material, or acts for achieving the specified function.

7. Claim 1 recites the phrases "a rod driving out means which", "a fastener retaining means which", and a "power operated fastener feed means which"; claim 2 recites the phrase "a rod

Art Unit: 3721

driving out means which"; claim 3 recites the phrase "a fastener retaining means which"; and claim 4 recites the phrase "the aforementioned feed means". In view of the 3-prong analysis, such phrases are NOT found to invoke 35 U.S.C. 112, sixth paragraph

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Crutcher (USPN 5,772,098).

In reference to claims 1 and 3, Crutcher discloses a portable type fastener driving tool comprising: a main body 3 housing a rod; a rod driving out means (within 4); a head part 8 disposed on a front end of the main body 3 which is provided with a fastener guiding part; a round fastener retaining means 2 including a cover ; and a power operated 30 fastener feed means on the fastener retaining means, the fastener feed means including a rotary type feed member 42 that rotates about a point 39.

***Allowable Subject Matter***

10. Claims 2 and 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: Upon examination, the art considered as a whole, alone or in combination, neither anticipated

Art Unit: 3721

nor renders obvious the claimed portable fastener driving tool comprising a rod powered by a gas source; a head part having a fastener guide part; and a fastener retaining means including a rotary feed gear that is powered by an electric motor for the purpose of feeding a fastener from the fastener retaining means to the fastener guide part, whereby such a configuration provides a smoother operation of the feed gear and reduces malfunctions.

The prior art discloses fastener driving tools having a pneumatically driven feed gear, wherein the both the rod and the feed gear are powered by a common pneumatic source. While electrically actuated pistons are known, there is no motivation to combine such actuators with the prior art since additional structure is required (i.e. control circuit) to properly motivate such a modification of two distinctly controlled actuators.

### ***Conclusion***

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations related to the claimed invention..
